User Guide	.1
Purpose	2
Installing	
Running	
Environment Variables	. 3
Configuration	3

#### Purpose

 Build a basic port scanner that mimics the behaviour of hping3 using scapy. This scanning technique is known as a TCP SYN scan and is commonly used because it provides basic information about the target's services without fully opening a TCP connection.

### Installing

git clone <a href="https://github.com/towelie03/7005">https://github.com/towelie03/7005</a> scapy crafting.git

#### Running

Open terminal and run: \$ python port\_scanner.py 192.168.1.10 --start 20 --end 80 --delay 100

#### **Environment Variables**

NA

## Configuration

Variable	Purpose
-h	Prints helps message
ip	Target IP to scan on
-s (start)	Target port to start scan on
-e (end)	Target port to end scan on

, · · · · · · · · · · · · · · · · · · ·	The delay between each scan converted from milliseconds to
	seconds
